## Ice-Machine Cleaner

**SNOW PLOW** is a specific chemical product with a fast and effective action, formulated to clean machines that produce ice. SNOW PLOW removes limescale, residues and mold, descaling the components (tanks, nozzles or coils) without damaging them. It is therefore able to guarantee a complete cleaning of the system. If used constantly, it has a preventive action on the formation of new incrustations and the growth of algae. The product has been specially formulated with "Food Grade" raw materials and tested not to freeze to machine standard working temperatures. SNOW PLOW cleans the drain from any residues. Rinsing the machine before starting the operations and eliminating the first ice produced, is recommended. Since the product is "Food Grade", any possible residual in the machine are not to be considered as dangerous.

### Benefits:

✓ Suitable for the HACCP plan.

## Cleaner for Refrigerated Spaces

**GREED** is a specific cleaner for refrigerated spaces – particularly for food use - such as cold rooms, refrigerators, freezers, cockpit refrigerator etc. GREED, while removing food residues, grease, scale and molds in a quick and effective way, purifies surfaces and slows the formation of new contaminants.

Used constantly it has a preventive action. It can also be used to clean drains of cold rooms. It is formulated with "Food Grade" raw materials without a specific taste, therefore, any possible residues do not affect the safety and quality of food in the refrigerated space.

### Benefits:

- ✓ Suitable for the HACCP plan.
- ✓ "Food Grade": any residues in the cell does not constitute danger for the food.

## Cleaner for Coffee Machines and Electric Kettles

**MOKA** is a fast and effective chemical product with descaling and anti-limescale action, specifically formulated to maintain and clean coffee machines and electric kettles. Its unique formula lets the product enter in the working cycle of these devices, removing limescale, residues and molds. MOKA descales water-tanks and nozzles without damaging them and guarantees the cleanliness of the whole appliance. Used constantly it has a preventive action: it prevents formation of new incrustations and the growth of new algae.

### Benefits:

- ✓ Suitable for the HACCP plan.
- ✓ Sustainable product for the environment and devices.
- ✓ It prolongs the coffee machine working-life ensuring the proper taste of coffee.
